

# Overview of enabling legislation

## Briefing

**The devil is in the details. Legislation enabling POEMs (Public Official E-Markets) would be detailed, requiring enormous scrutiny in the compilation. Getting it right keeps the system simple, fair, predictable.**

**WORK IN PROGRESS**

This paper shows the current structure for attempts to draft a “straw man” white paper for the required legislation. Our aim is not to define what the rules say but to ensure all the key questions get asked by anyone drafting that legislation for their territory.

Work on the detail of this continues.

### Contents

***Intentions of any legislation:*..... 4**

***Terms and conventions* ..... 5**

Glossary of terms.....5

Conventions used in this document .....5

***Scope of the platform* ..... 7**

**1) What do the markets trade?..... 7**

What is the primary focus? .....7

Subsidiary sectors: What financial services are permitted on the platform? .....7

Subsidiary sectors: storage facilities .....8

Subsidiary sectors: in-home freelancing .....8

Subsidiary sectors: Can the platform trade contractual agreements outside its own transactions? .....9

Subsidiary functionality: user “Newsfeed” .....9

**2) Who can use the platform? ..... 9**

What is the geographic area covered by the intended markets? .....9

What types of entities are permitted to register as users? ..... 10

What entry requirements apply? .....	10
Are anonymized users permitted? .....	10
<b>3) How are the markets structured? .....</b>	<b>11</b>
a) To what extent will this legislation stipulate details of market structures? .....	11
b) Is there a benchmark for public utility? .....	11

g) Functions of contracts in the platform.....	15
h) How does the platform resolve disputes between users? .....	16
i) Do intermediaries have a specific status on the platform? .....	16
k) What standards are set for reporting? .....	16
l) Are re-sellers encouraged?.....	17
<b>4) Fundamental controls on the markets .....</b>	<b>19</b>
a) What charges are imposed by the platform?.....	19
b) What other sources of income are permitted to operators? .....	21
c) To what extent can operators set prices for resources traded on the platform? .....	22
d) Is there a cap on transaction size? .....	23
e) To what extent does the platform facilitate discrimination between buyers and sellers?.....	25
f) Who owns the platform? .....	26
f) Can operators restrict what is traded on their platform? .....	27
g) How are operators regulated? .....	28
h) Does the platform have a role as a democratic institution?.....	29
<b>5) How is the platform accessed? .....</b>	<b>30</b>
<b>6) Interaction with government services.....</b>	<b>30</b>
a) Proving identity and certification .....	30
b) Dispute arbitration .....	30
c) Tax calculation and collection.....	31
d) Dispensing payments from official bodies .....	31
e) Employment support.....	32
f) Law enforcement and military interaction .....	33
g) Official announcements .....	33
<b>7) Non-revenue generating services.....</b>	<b>35</b>
a) Are their services mandated within the platform that won't produce proportionate revenue for operators? .....	35
b) Alternative currencies .....	35
c) Volunteering/Timebanking.....	36
d) Stability tools.....	36
e) Support for transitions to employment .....	37
f) Voting .....	37
g) Community building .....	38
h) Tools for interventions .....	38
i) Support in emergencies.....	39
i) Extraneous use of core functionality.....	39
<b><i>What the jurisdiction offers to operators.....</i></b>	<b><i>41</i></b>
<b>X) Agreement on scope .....</b>	<b>41</b>

a) Uniqueness of the facilities offered.....	41
b) Phasing of the facilities offered .....	41
X) Direct funding.....	42
X) Official disbursements through the platform. ....	42
c) How much public spending will go through the platform? .....	42
d) Preferential access to official facilities .....	44
i) Official databases .....	44
ii) Dispute resolution mechanisms .....	44
e) Marketing through official channels .....	45
f) Official status .....	46
g) Legal protections.....	47
h) De-regulation.....	47
i) Legislative solidity.....	48
X) Lower jurisdictions .....	49
X) Disbursement of surplus revenues.....	49
 <b><i>Obligations placed on operators .....</i></b>	<b><i>51</i></b>
<b>1) Commitment to platform scope.....</b>	<b>51</b>
Phasing.....	51
<b>2) What is to be funded? .....</b>	<b>51</b>
Core system .....	51
Secondary functionality.....	51
Interfacing to official systems .....	51
Non-revenue generating functionality.....	51
Non-platform facilities.....	51
<b>3) Platform standards.....</b>	<b>51</b>
User protection.....	51
Transparency .....	51
Robustness.....	52
Readiness.....	52
4) Protections for non-users.....	52
5) Payment of penalties.....	52
 <b><i>Selection of operator(s).....</i></b>	<b><i>53</i></b>
<b>1) Criteria for consideration .....</b>	<b>53</b>
a) Potential payment of bond.....	53
b) Acceptance of scope.....	53
c) Type of entity.....	53
d) Financial capability .....	53
e) Technological capability .....	53

e) Operations capability ..... 53  
g) Probity test ..... 54

**2) Criteria for selection..... 54**

a) Criteria ..... 54  
b) Handling a tiebreaker ..... 54  
c) Public vote ..... 54

**3) Process ..... 54**

a) Extend to which process and submissions made public ..... 54  
b) Timetable..... 54  
c) Notifications to bidders ..... 54
